The original authorship list was corrected to acknowledge the appropriate author contributions. Dr. Gleb Yakubov initiated the idea of studying mucin–EGCG binding using ITC. The methodology of ITC measurement for mucin–EGCG interaction was developed by Dr. Yakubov and Miss Aminiafshar. Miss Aminiafshar contributed in mucin sample preparation and training Miss Yanyan Zhao on the use of the ITC instrument. All the experimental studies and theoretical analysis reported in the paper have been carried out independently by Miss Yanyan Zhao under the joint supervision of Prof. Lujia Han, Dr. Guoping Lian, and Dr. Longjian Chen.
