Ind. Eng. Chem. Res. **2012**, *51* (26), 9129–9135; DOI: 10.1021/ie301293t

In this article, the following two corrections should be noted. In Figure 1, which appeared on page 9130, it is necessary to credit the Sigma–Aldrich Corporation, from which this depiction of the structure of lignin was obtained.

The corrected Figure 1 is shown below.

Figure 6, which appeared on page 9133, initially displayed the “char” data, using a scale on the left side of the plot, while the other three datasets used a scale on the right side of the plot.

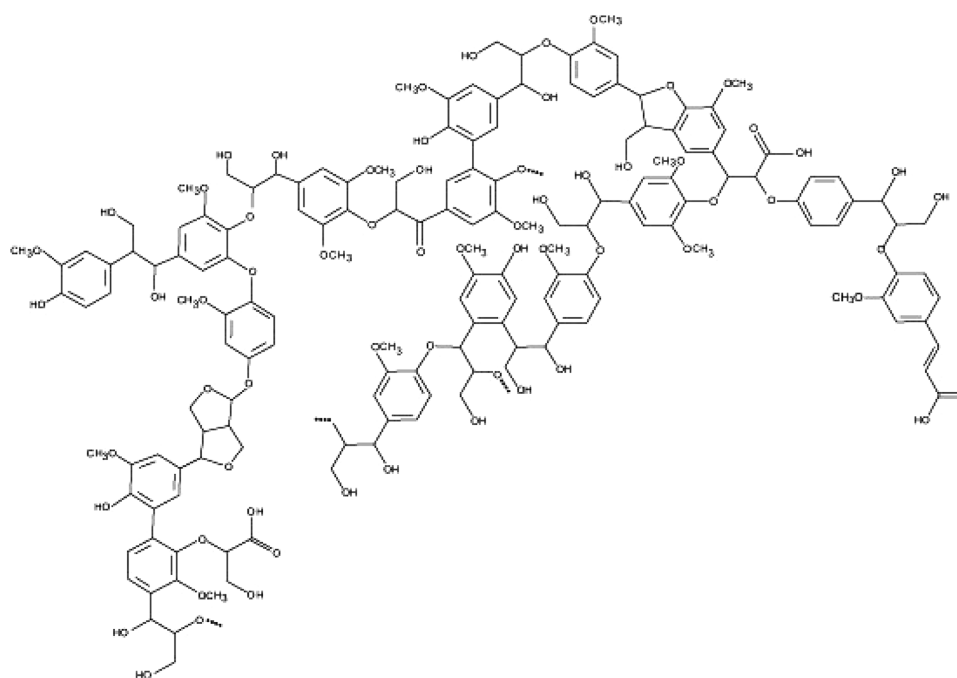

Figure 1. Lignin molecule (courtesy of Sigma–Aldrich Corporation).

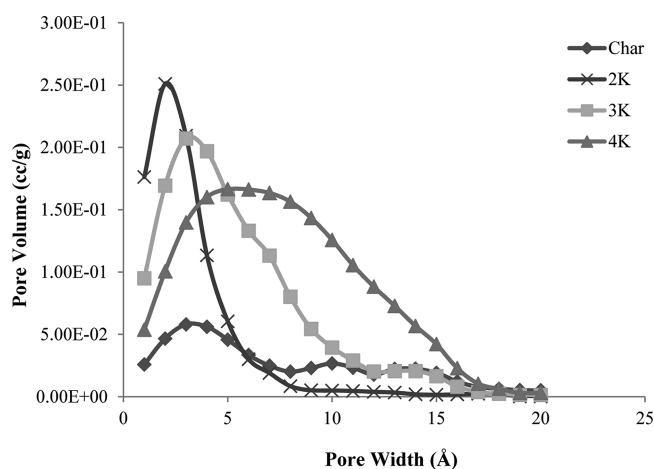

Figure 6. Pore size distributions of ALL-CRAFT carbons.

This has been corrected by placing them all on the same scale. Neither of these two corrections affects the original findings of the article.

The corrected Figure 6 is shown below.
