

Correction to “Adsorption of the Prototype Anionic Anthraquinone, Acid Blue 25, on Modified Banana Peel: Comparison with Equilibrium and Kinetic Ligand–Receptor Biochemical Data”

Maria Giovanna Guiso, Raffaella Biesuz, Teresa Vilariño, Marta López-García, Pilar Rodríguez Barro,* and Manuel E. Sastre de Vicente

Ind. Eng. Chem. Res. **2014**, 53, 2251–2260 (DOI: 10.1021/ie402900n)

We have noticed a typographical error in our recent paper, “Adsorption of the Prototype Anionic Anthraquinone, Acid Blue 25, on a Modified Banana Peel: Comparison with Equilibrium and Kinetic Ligand–Receptor Biochemical Data”, by Maria Giovanna Guiso et al.

Page 2255: In our published paper, the second paragraph on this page has the following statement: “Consequently, values comprised between 1.06×10^5 and 1.89×10^5 (m^2/g) are obtained for the specific surface area of the banana peel.” However, there is a typographical error in the exponent term given for the magnitude of the specific surface area of banana peel. It should read as follows: “Consequently, values comprised between 1.06×10^2 and 1.89×10^2 (m^2/g) are obtained for the specific surface area of the banana peel”.
