

Estimation of Surface Tensions of Paraffin Hydrocarbons Using a Novel Predictive Tool Approach and Vandermonde Matrix

Alireza Bahadori

Energy Fuels **2011**, 25 (12), 5695–5699, DOI: 10.1021/ef201317r

The author retracts the paper entitled “Estimation of Surface Tensions of Paraffin Hydrocarbons Using a Novel Predictive Tool Approach and Vandermonde Matrix” because of partial duplication of the text with his other paper, Bahadori, A. Development of Simple-To-Use Predictive Tool for Rapid Prediction of *n*-Alkanes Surface Tension. *SPE Projects, Facilities & Construction* **2011**, 6 (4), 173–178.
