

Experimental Measurements and Thermodynamic Modeling of the Dissociation Conditions of Clathrate Hydrates for (Refrigerant + NaCl + Water) Systems

Peterson Thokozani Ngema, Cassandra Petticrew, Paramespri Naidoo, Amir H. Mohammadi,* and Deresh Ramjugernath*

J. Chem. Eng. Data **2013** ASAP

The Editor and Corresponding Authors retract this article on the basis of irreproducible reported findings. Specifically the Authors have been unable to reproduce the experimental hydrate phase equilibrium data reported in Tables 7 and 8 for both (R507 + Water + NaCl) and (R410a + Water + NaCl), which they attribute to a possible leak in experimental equipment. The original article was published as an Article ASAP on July 10, 2013 and retracted on August 27, 2013. The PDF content of the original article accompanies this retraction as Supporting Information.
