

Correction to Structure—Activity Relationship and Mechanism of the Tocopherol-Regenerating Activity of Resveratrol and Its Analogues [*J. Agric. Food Chem.* **2008**, *56*, 11458. DOI: 10.1021/jf802673x]. Jian-Guo Fang and Bo Zhou*

We wish to clarify that all of the data of Table 1 and the oxidative potential values in Table 2 (page 11460), as well as Figure 6 (page 11461), of this paper were taken from Tables 1 and 2 and Figure 7, respectively, of our previous paper (ref 15 of this paper, *Chem. Eur. J.* **2002**, *8*, 4191–4198). The following credit line should be included in the caption of Figure 6: “Reproduced with permission from ref 15. Copyright 2002 Wiley-VCH Verlag GmbH & Co. KGaA.” We apologize for the source of these data and the figure not being annotated in the footnote of the table and in the legend of the figure or under Materials and Methods.
