*Environ. Sci. Technol.* **2012**, *46*, 12640–12647; DOI: 10.1021/es3025726

On page 12646, in the section “Interferences between the Substrates in the 3D-BER”, line 5, the description of “as listed in Table 3” was wrong. The sentence should be as follows: As concentration of Fe(III)EDTA increases, reduction rate of Fe(II)EDTA-NO decreases accordingly. This correction does not impact the original findings.
