

Correction to Life-Cycle Greenhouse Gas Emissions of Shale Gas, Natural Gas, Coal, and Petroleum

Andrew Burnham,* Jeongwoo Han, Corrie E. Clark, Michael Wang, Jennifer B. Dunn, and Ignasi Palou-Rivera

Environ. Sci. Technol. 46, (2), 619–627. DOI: 10.1021/es201942m

S Supporting Information

A new Supporting Information file has been provided that corrects Table S1, as the units for well completions, workovers, and liquid unloadings were changed in the text from “metric ton CH₄” to “metric ton NG” to highlight that EPA incorrectly labeled these in their Subpart W report. However, the calculations in our report already accounted for this issue and therefore are not changed in this correction. Correspondingly on page 621 of our article, the units for completions/workovers, “177 t of CH₄”, and unloadings, “11 t of CH₄” and “26.7 t of CH₄”, should be “t of NG”.
