

Kinetic Study of Methoxycarbonylation of Methylene Dianiline with Dimethyl Carbonate Using Lead Acetate Catalyst [*Industrial & Engineering Chemistry Research* 2011, 50, 1955–1961. DOI: 10.1021/ie1017095]. Yixia Pei, Huiquan Li, Haitao Liu, and Yi Zhang

On page 1957, in the subsection of the Results and Discussion section entitled “3.1. Catalyst Selection and Reaction Process”, the lines, symbols, and associated data in Figure 1 are not matched properly. The figure should be corrected as follows:
